POSTER & VINYL LETTERING

## How to apply vinyl lettering?

Step 1: Clean the surface with glass leaner and a dry cloth. Dirt and dust particles will cause vinyl decals to bubble. Then wait 5-10 minutes to let it dry.

Step 2: Put the vinyl lettering on the right position you want and use masking tape to fix it. Adjust if not symmetrical.

Step 3: Peel the backing paper away from the lettering. Be sure you peel it slowly and carefully.

Step 4: Leave letters on the surface, DO NOT press them now, until all are on the right position flatly.

Step 5: Lightly press the letterings, and be sure they are not bended. Ok, now its time to press each letter firmly. Remember, press them One-by-One.

Step 6: Peel the transfer film off. You almost succeed, but still should do it slowly, because some letters may be still stucked on the transfer film.
